

coverage must be adequate, affordable, and accessible.² Together, our organizations understand what individuals and families need to prevent disease, manage health, and cure illness. Our organizations are deeply concerned about how the new 1332 guidance will affect the individual marketplace's stability in states that choose to pursue some of the policies allowed under this guidance, including those that promote short term plans and other substandard coverage. We are pleased that this legislation represents a significant and meaningful step towards protecting all Americans from coverage that does not cover what they need to promote their health and well-being.

As you know, the 1332 guidance substantially erodes the guardrails

Sincerely,

Hemophilia Federation of America
